Diabetic foot is characterized by its chronicity and high prevalence of infection and is often an outcome of an inadequate treatment. There are multiple factors which determine the clinical expression and evolution of the diabetic foot. Treatment of the diabetic foot must take into account a series of factors which depend on a complex interaction between the patient and the medical services. These factors include: correct and systematic evaluation of vascular risk; prior diagnosis and treatment of the cardiovascular disease of the patient; correct treatment of the metabolic disease; an early identification of the neuropathic component; an adequate periodical evaluation and treatment of the infectious factors; a correct immobilization and the use of offloading devices; an adequate analgesic and antimicrobial treatment; a correct anti-ischemic and anti-inflammatory treatment; a correct wound care; a correct foot protection, offloading and neuropathic treatment. Only through an integrated management of the pathogenic factors can the diabetic foot be cured or at least make it as good as it could have been.Q: macro to create a gif from a html page For a project we are trying to create a tiff of a site that is converted from HTML5. We are trying to figure out how we can do this with a macro. I have seen lots of info on screen recorders and conversions (www.webopplus.com, www.xpertscreenrecorder.com) but we want to build it in such a way that we can use it for other sites (html
