As for me, I don't believe that much; I haven't proved that much. -Be a man. Dear friend, some people do a lot of things in life, but they are unable to endure suffering. Most are unable to stand the blows of life. They don't even count on the future. They are either caught by doubts or are simply not sure of themselves. It's not that people don't have doubts in life; most of us can't get out of them. The problem is that we won't endure them. When we suffer, we give way. As a result, we get caught in pain, and so we aren't able to consider anything new. It isn't that we don't believe in God. People who want to live in the path of perfection never believe in God, but they believe that there is a superior being, creator, and they are sure of having a future. They won't be caught in doubt. When they suffer, they endure and they never give in to doubts. If you have no future, when you suffer, you don't have a way out. You can't even consider that there is a way out. You will lose all your energy; you will become disappointed and bitter, and that is the most painful thing you can suffer. You will lose all your joy and you'll say "Why am I here?" You won't be able to understand this state. So, when you suffer, you should be a man, but you should never be a man who believes. To believe that there is a way out is the opposite of suffering. If you don't believe, how can you understand suffering? But if you have a way out, you'll be able to understand suffering. You'll be able
