Amazeballs 12-28-2004, 05:49 AM Im gonna buy this game And I know what its about but I love rpg's like this. me like's magic items and skills and fighting Pretty darn fine. I'm going to pick this up simply because I'd appreciate an updated and fun take on the elder scrolls franchise. Much like Skyrim, I'll play this solely due to the fact that it will be very enjoyable. I know what it's about already, but that's why I love roleplaying games. Oh, and when are you going to have a copy of Sanctum? You've been working pretty hard on that lately. :P Master_Consul 12-28-2004, 06:02 AM This game looks pretty good! There's a lot of

5 Outstanding " The game is a good combination of RPG and Action RPG that you wouldn't have thought to combine. " " The story is worth your time to play. " " I really want a sequel to this game as a director. " 5 Outstanding " A great game. The story and gameplay are more enthralling than any game I have played all year. If you play it you will want to play more. " " This is the most epic game I have played all year, and I have played more than most of you! " 4 Good " My favorite game is Dragon's Crown, which I got to play for the first time the other day.This game is actually quite similar to the grindy RPG genre, but it's less similar to the other grindy game, Diablo. It's a game in which you collect resources with your characters and then equip them with an action based game.This sounds so boring and simple to implement, but it's amazing how it works. The game is very effective and the character switching system is cool. The combat system is not amazing by any means, but it is effective. It's basically like the team based shooters such as Halo or Destiny. The graphics are quite good, and there is great detail in the environments you explore. Unfortunately, the game lacks in a lot of areas, such as features and replay value. My favorite element is the final boss. It's not particularly hard, but your player when you beat it is very happy. There are features I really want that I can't find in the game, such as a second player, a mechanism to upgrade your level, and a way to fast travel. Perhaps if I could find another game like this, I would be more interested. I ended up playing nearly 40 hours with this game, and I regret to say that the replay value isn't really there. Lastly, the lack of a way to stream lines of gameplay makes this game harder to play. I know many players who prefer the constant stream of gameplay, and I know that I prefer it. Nonetheless, the game is great. If you're looking for something you can play right now, give this a try. I don't know how much replay value there is to this game, but I'll guess that there is some. While it is still on a high level compared to the rest of the roster, as we're developing before main league content is released, the graphics will not be complete at the start. For the game to come out with a higher quality and perfect world theme, it will be necessary for the artists to work not only on the character graphics but also on the environment graphics and the overall design as it is.

In a scene that requires advanced MMO game system functions, such as large amount of concurrent participants and a large amount of players at once, it is not possible for all players to share their accounts on a single server. y. Check also my other Unpacked rar files Due to the heavily flawed english in this game, atleast the main English voice from game was removed, since no native english speaker will even dare to pronounce the lore words in this game just from casual listens of the recorded line and actual words in the game. It is not a patch or a mod, the problem lies not only in the game but in the voice too, it is fully out of its mind to pronounce the future words here, therefore this problem is not only about the translation and may lie in the voice, but it is also one of my major conclusions that I found out, and I just confirmed, the voice is not used in official play/live mode. I want to see the developers learn the voice it self first. You know how hard it is to make a voice in 3rd person perspective. Probably they need an acoustics expert, to say "Elend" instead of "Chentello" etc. I know english is the primary language in the world. The english language is itself more difficult to learn then the other 2 language in this world. Thank English is too universal of a language compared to other languages, and this is a big problem for the developers, so
