The Reserve Bank has today lifted its base interest rate by 25 basis points toÂ . 2008 11 14 I Kaun Rokeya Mujhe Full Movie Hd 720p.1. Field of the Invention The present invention relates to a method for blowing an insulating foam onto a surface of a substrate for airbag applications, and to the airbag resulting from that process. More particularly, the invention relates to such a method wherein the blowing apparatus is moved along the substrate, and more particularly still, to a method for blowing an insulating foam in which the blowing apparatus moves along the circumference of the substrate. 2. Description of the Related Art It is known to apply an insulating foam to a substrate, for example, to an inner surface of a vehicle door or the like, in order to protect the substrate against undesirable contact with a person's body. Typically, this insulating foam comprises a polymer composition, such as a urethane polymer, which has been mixed with a frothing agent to produce a foam having an open-cell structure. To this end, the foamable polymer composition is extruded into a frothing agent-containing enclosure in order to produce a froth, which is then forced through a plurality of holes in a screen or the like, in order to produce a foam having a bubble structure. The foam can then be applied to a surface of the substrate. For example, the foam may be applied to a steel inner door of a vehicle, in order to protect passengers in the event of a collision. This process for blowing an insulating foam onto a surface of
