It's also a good thing that Adobe hasn't added too many new features to Photo Shop. 8.0 continues to be a great program for getting a job done. The latest version seems to be as responsive to new platform and user needs as previous versions. One final thing I should say is that Adobe still isn't taking advantage of the previous experience they have with computer users. Many users spent hundreds of dollars building their own libraries of thousands of RAW files, but Adobe didn't take advantage of this. A smart move for them would have been to make Lightroom much more online, so that users can access their files without worrying about storing them on local drives. With Lightroom Online, your library (even with its current limits) can be accessed via web browser on your mobile device. Sure, it's not automated with hardware activation, but you can go to www.adobe.com/lightroomonline in your web browser, get registered, and have your library to go from there. Unfortunately, there seems to have been a shift in focus for Lightroom Online for the newly released release. It doesn't appear to be as expansive as once thought, and it seems that Office 365 integration was also dropped. At this point, it's not clear if the changes as planned and if they will be kept as is with further updates. In any case, for existing users, it's good that there is a solution for accessing your files. If Lightroom was integrated more within Office 365 like others have suggested, then it would be ideal.

Since you'll be working with several different applications, you'll want to find software that's intuitive. For Adobe software, I recommend Adobe Photoshop because it allows a user to work with various types of software. Many users like working with GIMP because it's open-source and free. As for the popular graphics software, you can use CorelDraw, InDesign, and Illustrator. **What it Does** You can create one of many effects, such as: Contours: This option helps you to quickly erase areas of the image. It does so by editing the colors in the image and automatically adjusting to match what's in your image. Magic Wand: This feature gives you the ability to select a region of the image and replace the colors with a custom color. It will tell you which areas of the image are affected by the change. You can name your document or choose to use the default name. Make sure to select the correct file format. Depending on what type of graphic you are creating, you must choose between JPEG or PNG for your format. The Gradient tool lets you create gradients in Photoshop. You can use colors, patterns, and even create custom ones. Gradients are tools that allow you to change the color and intensity of an image in your images. You'll also need brushes or maybe you'll have to draw your own artistic brushes. This is where Illustrator or Photoshop comes in. You can also use a consistency template to create custom brushes. **What It Does: The Smart Brush Tool:** The Smart Brush Tool is a brush tool that uses machine learning to offer layers of customizations. You can change the size and hardness of the brush, adjust the opacity and flow of the paint, apply gradients and multiply colors, and even set brush priority. **The Pen Tool:** The Pen Tool offers a plethora of brush tip options that includes a variety of tip shapes, size, opacity, and flow that you can control. The Pen Tool also allows you to add curves, lines, and text. **The Gradient Tool:** The Gradient Tool is the most versatile tool in Photoshop and the most universal. The Gradient Tool is the tool that allows designers and graphic artists to use a variety of custom colors to create and alter custom visual effects, such as colors, gradients and patterns. **The Liquify Tool:** The Liquify Tool allows users to distort and reshape entire objects. This tool can warp and move shapes, create curls and transforms, and even change the rotation of any layer. **The Eraser Tool:** The Eraser Tool allows users to remove unwanted objects or areas of objects from their images. It is also a very powerful tool that can be used to erase fine lines or small objects, as well as erasing parts of letters or signatures. 933d7f57e6
