How to Create Eye-Catching Animated Charts with Swiff Chart Pro 3.5

If you are looking for a way to create high-impact charts for your presentations, reports, or websites, you might want to check out Swiff Chart Pro 3.5. This software lets you quickly and easily create animated charts in Flash, PNG, Jpeg, PDF, and SVG formats. You can paste your data from a spreadsheet or import a formatted text file, choose from a variety of predefined chart styles, adjust parameters such as colors, fonts, legends, and animations, and instantly export your chart in the format of your choice.

Swiff Chart Pro 3.5 is the professional edition of Swiff Chart, which offers more features and customization options than the standard edition. With Swiff Chart Pro 3.5, you can create 3D charts, add interactivity and sound effects, use advanced data analysis tools, and integrate your charts with XML and ASP.NET.

To get started with Swiff Chart Pro 3.5, you need to download the software from the official website^[^4^] and install it on your computer. You can try it for free for 30 days before purchasing a license. Once you have installed the software, you can launch it and follow these steps to create your first chart:

1. Select the type of chart you want to create from the menu bar. You can choose from bar, line, area, pie, scatter, bubble, radar, polar, candlestick, stock, and Gantt charts.
2. Enter or import your data into the data table. You can copy and paste your data from Excel or another spreadsheet program, or import a CSV or XML file.
3. Choose a chart style from the style gallery. You can browse through different categories of styles such as business, education, finance, health, sports, etc. You can also create your own custom style by modifying the properties of an existing style.
4. Adjust the parameters of your chart using the property panel. You can change the size, position, orientation, background color, border color, title text, axis labels, grid lines, legend position, data labels, tooltips, etc. of your chart.
5. Add animation effects to your chart using the animation panel. You can choose from various effects such as fade in/out, zoom in/out, slide in/out, rotate in/out, bounce in/out, etc. You can also control the speed and timing of the animation.
6. Add interactivity and sound effects to your chart using the action panel. You can assign actions such as play sound, go to URL, show/hide object, etc. to different events such as mouse click, mouse over/out,

Export your chart in the desired format using the export panel. You can choose from Flash, PNG, Jpeg, PDF, and SVG formats. You can also adjust the resolution, quality, and compression of your output file.

That's it! You have created a simple bar chart with Swiff Chart Pro 3.5. You can use the same steps to create other types of charts, such as line, area, pie, scatter, bubble, radar, polar, candlestick, stock, and Gantt charts. You can also mix and match different marks to create combination charts.

Swiff Chart Pro 3.5 is a powerful and easy-to-use tool for creating animated charts that can enhance your presentations, reports, or websites. You can download a free trial version from the official website and see for yourself how Swiff Chart Pro 3.5 can help you communicate your data effectively.
