How to play Plague Inc on iPad: basic gameplay and tips

Plague Inc is a game that requires strategy, creativity, and patience. Your goal is to infect and kill every human on earth with your custom-made plague, while adapting to various environments and events. Here are some basic gameplay tips to help you get started:

- Choose a disease type. There are 10 different disease types in Plague Inc, each with their own strengths and weaknesses. For example, bacteria are resilient but not very adaptable, while viruses mutate rapidly but are hard to control. You can unlock more disease types by completing the game with different difficulty levels.
- Choose a starting country. This is where your plague will begin its infection. You can choose any country in the world, but some are easier or harder than others. For example, starting in an isolated country like Madagascar or Greenland can make it harder for other countries to detect your plague, but also harder for you to spread it. Starting in a warm, poor, or densely populated country like India or Brazil can make it easier for you to infect more people, but also easier for them to resist or cure your plague.
- Earn DNA points. DNA points are the currency of Plague Inc. You can use them to evolve your plague with new traits and abilities. You can earn DNA points by infecting more people, popping DNA bubbles that appear on the map, or devolving unwanted mutations.
- Evolve your plague. You can access the evolution menu by tapping on the DNA icon at the bottom right corner of the screen. There are four categories of traits that you can evolve: transmission, symptoms, abilities, and special. Transmission traits increase the ways that your plague can spread, such as through air, water, animals, or blood. Symptoms traits cause various effects on the infected people, such as coughing, vomiting, insomnia, or necrosis. Abilities traits enhance the survivability and stealth of your plague, such as heat resistance, cold resistance, drug resistance, or genetic hardening. Special traits are unique to each disease type and give them special powers, such as zombie creation, mind control, or nano-virus deactivation.
- Monitor the world. You can see the status of the world by tapping on the world icon at the bottom left corner of the screen. There you can see various information and statistics, such as the number of infected, dead, healthy, and cured people, the cure progress, the government responses, the news headlines, and the world map. You can also zoom in and out of the map and tap on any country to see more details about it.
- Adapt to the situation. Plague Inc is a dynamic game that changes according to your actions and the world events. You will face various challenges and opportunities as you play, such as natural disasters, wars, riots, festivals, research breakthroughs, vaccine development, and more. You will need to adapt your strategy and evolve your plague accordingly to overcome these obstacles and take advantage of these situations.
- Win or lose. You win the game when you have killed every human on earth with your plague. You lose the game if your plague is eradicated by a cure or if there are no healthy people left to infect.

Plague Inc is a game that requires a lot of trial and error and experimentation. You may not succeed on your first try, but don't give up. Learn from your mistakes and try again with a different strategy or disease type. You will soon discover the joy of creating a global pandemic on your iPad.

Plague Inc: Features and Modes

Plague Inc is not just a simple game of infecting and killing people. It is also a game that offers a lot of features and modes that make it more diverse and interesting. Here are some of them:

Different disease types and scenarios

As mentioned before, Plague Inc has 10 different disease types that you can choose from: bacteria, virus, fungus, parasite, prion, nano-virus, bio-weapon, simian flu (from Planet of the Apes), shadow plague (from vampires), and cheat mode (where you can customize your plague). Each disease type has its own characteristics and challenges that make them unique and fun to play.

Plague Inc also has 25 different scenarios that you can play. Scenarios are special modes that have different settings and objectives than the main game. For example, in the Black Death scenario, you play as the bubonic plague that ravaged Europe in the 14th century. In the Nipah Virus scenario, you play as a new virus that emerged in India in 2023. In the Fake News scenario, you play as a misinformation campaign that spreads lies and distrust around the world. Scenarios add more variety and replay value to Plague Inc.

Hyper-realistic world simulation and AI

Plague Inc is not just a game of numbers and stats. It is also a game that simulates a realistic world with complex AI behavior. The game uses advanced algorithms and data from real-world sources to create a realistic representation of how humans would react to a global pandemic. For example, countries will close their borders, airports, and ports when they detect an outbreak. People will wear masks, wash their hands, or avoid contact with others when they are sick. Governments will impose lockdowns, quarantines, or martial law when they are desperate. Scientists will work together to develop a cure or a vaccine when they are threatened.

The game also features dynamic events that can change the course of the game. For example, a volcanic eruption can disrupt air travel and spread ash particles. A terrorist attack can cause panic and chaos. A zombie apocalypse can unleash hordes of undead. These events can create new opportunities or challenges for your plague, depending on how you react to them.

Expansion updates and DLCs

Plague Inc is a game that is constantly updated and improved by the developer, Ndemic Creations. The game has received many expansion updates and DLCs that add new content and features to the game. For example, the Mutation 1.7 update added the Neurax Worm, a mind-controlling parasite that can enslave humanity. The Mutation 1.8 update added the Necroa Virus, a zombie-creating virus that can reanimate the dead. The Mutation 1.9 update added the Simian Flu, a virus that can enhance the intelligence of apes and trigger a war between humans and apes.

The game also has several DLCs that you can purchase to support the developer and enjoy more content. For example, the Plague Pack DLC gives you access to all the premium disease types and scenarios. The Scenario Creator DLC lets you create your own custom scenarios and share them with other players. The Custom Scenarios DLC lets you play thousands of user-generated scenarios from other players.

Plague Inc: The Cure

Plague Inc: The Cure is a new game mode that was released in 2020 in response to the COVID-19 pandemic. It is a free update that lets you play as the other side of the coin: instead of creating a plague, you have to save the world from one.

In Plague Inc: The Cure, you have to work with global health authorities and governments to implement measures to stop the spread of a deadly disease. You have to allocate resources, conduct research, develop vaccines, enforce lockdowns, trace contacts, and more. You also have to balance the economic, social, and political impacts of your actions, as well as deal with fake news, anti-vaxxers, conspiracy theorists, and other threats.

Features and challenges of The Cure

Plague Inc: The Cure is a game mode that offers a different perspective and challenge than the main

game. It is also a game mode that reflects the real-world situation and issues of the pandemic. Here are some of the features and challenges of The Cure:

- You can play The Cure with any disease type and scenario in the game, or create your own custom disease and scenario.
- You can choose from four difficulty levels: casual, normal, brutal, or mega-brutal. Each difficulty level affects how fast the disease spreads, how hard it is to cure, how cooperative the countries are, and how realistic the events are.
- You have to use five different operations to fight the disease: investigation, analysis, response, vaccine, and authority. Each operation has its own menu of actions that you can take, such as sending field operatives, deploying test kits, imposing social distancing, developing vaccine candidates, or declaring emergencies.
- You have to monitor various indicators on the world screen, such as infection rate, death rate, cure progress, healthcare capacity, authority level, and public support. You can also see the news headlines, the country details, and the disease traits.
- You have to deal with various events and dilemmas that can affect the outcome of the game. For example, you may have to choose between prioritizing vaccine research or contact tracing, or between enforcing a strict lockdown or allowing some economic activity.
- You have to face various threats and challenges that can hinder your efforts. For example, you may have to deal with fake news that spreads misinformation and fear, anti-vaxxers that refuse to get vaccinated or sabotage vaccine facilities, conspiracy theorists that accuse you of creating the disease or hiding the cure, or rogue states that ignore your advice or launch bioweapons.

Plague Inc: The Cure is a game mode that tests your skills and knowledge as a global health leader. It is also a game mode that educates and informs you about the realities and complexities of fighting a pandemic. It is a game mode that is relevant and timely in the current situation.

How to access The Cure on iPad

Plague Inc: The Cure is a free update that is available for all players who have Plague Inc on their iPad. You can access The Cure by following these steps:

1. Launch Plague Inc on your iPad.
2. Tap on the "Play" button on the main menu.
